TIC The Internet Company and Cyberlink Internet Services enter into a partnership.

Rotkreuz, Switzerland, April 19th 2006 – TIC The Internet Company Ltd. and Internet Service Provider (ISP) Cyberlink Internet Services Ltd. Zurich enter into a partnership. Cyberlink is using the Hosted Exchange platform of TIC and will introduce Hosted Exchange products in a white labeled version for its customers.

Cyberlink clients will take advantage of all features like Mobile Email (Mail on the Move), contacts, global address book, calendar, task management, journal function, notes, reminder function and unlimited mobile use. With an appropriate mobile device (SmartPhone, PDA with Windows Mobile 5.0) emails, calendar, contacts or tasks will be sent without any request needed (Direct-Push-Technology).

«We operate one of the latest independent Hosted Exchange platforms and make it available to Cyberlink in a white labeled version» says Franz Grüter, CEO and President of TIC The Internet Company Ltd. The established ISP Cyberlink Internet Services Ltd. Zurich offers their clients Hosted Exchange and relies on the TIC high end World Class Data Center in Zurich and the highly sophisticated Hosted Exchange platform of TIC The Internet Company Ltd.

«With Hosted Exchange we provide our clients a new, up-to-date and groundbreaking ISP solution. With the collaboration TIC ensures our clients access to high quality and innovative ICT services in the fields hosted services and system integration» says Ramon Amat, Commercial Manager of Cyberlink. «The white labeled version, competitive pricing and the quality of service made us take the decision on relying on TIC The Internet Company Ltd.» says Ramon Amat, Commercial Manager of Cyberlink.

Cyberlink covers all products and services for reliable and fast Internet connections: starting with Internet access services with hosting and housing up to fast broadband Internet services with xDSL technologies. Now Hosted Exchange services of TIC The Internet Company Ltd. are completing the range of products. More information: www.cyberlink.ch

TIC The Internet Company Ltd. is extending its position as «Full Service Internet Provider» with numerous national and international strategic partner channels. The partnership with Cyberlink is another step further in the success strategy. TIC The Internet Company Ltd. is planning to enlarge the partner-channel with more strategic distribution agreements.
